                                                                                                                                       Sequences AAY58219-Y58220 represent encoded and mature canine interleukin cf (IL-5). The invention relates to canine IL-4, canine or feline Plt-3 cliqand, canine or feline CD40, canine or feline CD154 (CD40 ligand), canine IL-5, canine IL-13, feline interferon-alpha (IRV-alpha) and feline canine IL-5, canine IL-13, feline interferon-alpha (IRV-alpha) and feline granulocyte macrophage colony-stimulating factor (GMCSF), and nucleotides which encode these immunoregulatory proteins. The proteins, their associated nucleic acids, specific antibodies and inhibitors may be used as vaccines for therapeutic or prophylactic regulation of an immune response in animals (particularly cats, dogs, horses and humans). They may be used to treat autoimmune or infectious diseases including callergies, tumours, inflammation and graft rejection, and to increase the response from a co-administered antigen. The nucleotide sequences can also be used for the recombinant production of a protein, while cas sources of inhibitory therapeutics (e.g., antisense oligonucleotides). The proteins may be used to raise antibodies and to screen for modulators of activity, while the antibodies may be used in detection, and in drug

This can be used to treat allergies, cancer and inflammatory reactions in dogs. The present sequence is one version of the IL-5 protein shown in the specification
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Canine interleukin-5

                                                                                                                                                                                                                                                                                                                    S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequences AAY58219-Y58220 represent encoded and mature canine interleukin 5 (IL-5). The invention relates to canine IL-4, canine or feline Plt-3 ilgand, canine or feline CP16, canine CD164 (CP40 ilgand), canine or feline CD164 (CP40 ilgand), canine IL-13, feline interferon-alpha (CP40 alpha) and feline granulocyte macrophage colony-stimulating factor (GMCSP), and nucleotides which encode these immunoregulatory proteins. The proteins, their associated nucleic acids, specific antibodies and inhibitors may be used as vaccines for therapeutic or prophylactic regulation of an immune response in animals (particularly cate, dogs, horses and humans). They may be used to treat autoimmune or infectious diseases including allergies, tumours, inflammation and graft rejection, and to increase the response from a co-administered antigen. The nucleotide sequences can also be used for the recombinant production of a protein, while nucleotide fragments are useful as probes, as amplification primers and as sources of inhibitory therapeutics (e.g., antisense oligonucleotides). The proteins may be used to raise antibodies and to screen for modulators of activity, while the antibodies may be used in detection, and in drug
                                                                                                                                                                                                                                                                                                                                                       Query Match

CC or II-12 are used to treat and/or prevent infections in livestock (esp. CC cows and sheep), particularly where the animals are stressed, e.g. during CC transport. II-5 and II-12 can also be used as adjuvants in vaccines for veterinary use (partic. weakly immunogenic subunit or synthetic peptide CC vaccines). They may also be used to treat cancer, immunosuppression and CC allergy, to enhance/suppress the reproductive system and to promote CC growth or early maturity. Optionally interleukin can be delivered from CC constructs or delivery cells and antibodies are useful in enzyme CC immunosuspass for rapid diagnosis of infection. The interleukins are immunosused for rapid diagnosis of infection. The interleukins are CC immunopotentiators, especially II-5 promotes growth of early haematopoietic progenitor cells and generation of cycotoxic cells from CC themocytes, also it stimulates production and secretion of IgM and IgA CC (in synergism with bacterial endotoxin). II-12 induces production of CC gamma-interferon by, and proliferation of, T and NK cells and increases CC can also be used for in vitro production of II-5 or -12. (Updated on 17-CC OCT-2003 to standardise OS field)

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             The present invention provides the protein and coding sequences of the canine interleukin-5 (IL-5) protein. This can be used to treat allergies, cancer and inflammatory reactions in dogs. The present sequence is human
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Guo

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      the core particle by at least one covalent bond. Also disclosed is an cantigen or antigenic determinant with at least one second attachment site, where the antigen or antigenic determinant is amyloid beta peptide (Abetal-42) or its fragment and where the second attachment site is selected from an attachment site not naturally occurring with the antigen or antigenic determinant and an attachment site naturally occurring with the antigen or antigenic determinant, where the second attachment site is capable of association through at least one non-peptide bond to the first attachment site and where the antigen or antigenic determinant and the scaffold interact through the association to form an ordered and repetitive antigen array. The invention also comprises a coat protein capable of forming a capsid which comprises mutant Obeta coat protein capable of forming a capsid which comprises mutant Obeta coat protein capable of forming a capsid which comprises mutant Obeta coat protein capable of forming a capsid which componed so the invention may having an amino acid sequence selected from five amino acid sequences fully defined in the specification. The compounds of the invention may having a main and may be used in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    This invention relates to a novel ordered and repetitive antigen array used in the production of vaccines for infectious diseases. The invention also discloses a composition comprising a non-natural molecular scaffold comprising a core particle selected from a core particle of a non-natural origin and a core particle of natural origin and an organiser comprising at least one first attachment site, where the organiser is connected to
                                                                      inflammatory immunė disease; myasthenia gravis; multiple sclerosis; immunoproliferative disease lymphadenopathy; Alzheimer's disease; angioimmunoproliferative lymphadenopathy; immunoblastive lymphadenopathy; rheumatoid arthritis; diabetes; infectious disease; factor Xa;

```
CC one covalent bond; (b) an antigen or antigenic determinant with at least CC one second attachment site, where the antigen or antigenic determinant is CC amyloid beta peptide (Abeta 1-42) or its fragment, and where the second CC attachment site is selected from: (i) an attachment site not naturally CC occurring with the antigen or antigenic determinant; and (ii) an attachment site is eselected from: (i) an attachment site not naturally cocurring with the antigen or antigenic determinant; and (ii) an attachment site not naturally occurring with the antigen or antigenic determinant; and (ii) an cocurring with the antigen or antigenic determinant; and the scaffold interact through at least one non-peptide bond to the first attachment site; and cocurring where the antigen or antigenic determinant and the scaffold interact through the association to form an ordered and repetitive antigen array. The composition is used in communisation and as a vaccine for diseases such as influenza, graft corspiratory distress syndrome (ARDS). Crohn's disease, allergic asthma, caute lymphoblastic leukaemia, non-Hodgkin's lymphoma, Grave's disease, cocurring and infectious disease lymphadenopathy, cocurring containing limitantoid arthritis, diabetes, multiple sclerosis, Alzheimer's disease, cotto use in the array of the invention. The antigen is modified to posses contained linker peptide which serves as the attachment point to a corresponding limitant

                                                                                                                                                                                            The invention relates to haplotyping the human interleukin 5 (II5) gene of an individual, comprising determining if the individual has one of the II5 haplotypes or haplotype pairs fully defined in the specification. Haplotyping the II5 gene of an individual, comprises determining the identity of the nucleotide at two or more polymorphic sites in one copy of the gene. The method also involves identifying an association between a trait and a haplotype or haplotype pair of the II5 gene, comprising comparing the frequency of the haplotype/pair in a population exhibiting the trait with that of a reference population. A higher frequency in the trait population indicates the trait is associated with the haplotype. The polymucleotides and screened compounds are useful to develop inflammatory disorders such as asthma. The present sequence represents the mains acid sequence of interleukin 5 (II5) as described in the method
                                                                                                                                                     Sequence 134 AA;
                                                                                                                                                                                                                                                                                                                                                                                                                                 Claim 27, Fig 3; 65pp; English.

                                                                                                                                                                                                                          The invention describes protecting an animal from a disease or condition that can be treated by wild-type granulocyte macrophage colony stimulating factor (GM-CSF) comprising administering to an animal having the disease or condition a composition comprising GM-CSF cysteine mutein. The methods are useful for preventing or treating the occurrence of neutropenia in an animal, the neutropenia is selected from neutropenia resulting from myelosuppressive chemotherapy, neutropenia associated with bone marrow transplantation, neutropenia associated with infection with the human immundeficiency virus, neutropenia associated with burns, surgery, dilatation, anaemia and neonatal septicaemia, severe chronic neutropenia, neutropenia associated with aplastic anaemia and acute leukaemia. This is the amino acid sequence of human interleukin 5 (IL-5), leukaemia.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              immunostimulant; granulocyte macrophage colony stimulating factor; GM-CSF; neutropenia; myelosuppressive chemotherapy; bone marrow transplantation; HIV infection; burn; surgery; dilatation; anaemia; neonatal septicaemia; severe chronic neutropenia; aplastic anaemia; acute leukaemia; human; growth hormone super family; aplastic anaemia; acute leukaemia; human; growth hormone super family;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Protecting an animal from a disease or condition, useful for neutropenia, comprises administering to an animal having the condition a composition comprising GM-CSF cysteine mutein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Homo sapiens.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Human interleukin 5 (IL-5).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ADF70849;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ঠ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                밁
                                                                            and at least one antigen, which is a protein or peptide of interleukin (IL)-5, IL-13 or eotaxin and is bound to the virus-like particle, or a core particle with at least one first attachment site and at least one antigen with at least one second attachment site, where the antigen is a protein or peptide of IL-5, IL-13 or eotaxin. The second attachment site is a protein or peptide of IL-5, IL-13 or eotaxin. The second attachment site is a protein or antigenic determinant. The second attachment site is capable of association to the first attachment site, and where the antigen or antigenic determinant and the core particle interact through the association to form an ordered and repetitive antigen array. The compositions are useful as medicaments, or for manufacturing a medicament or a vaccine for treating allergic eosinophilic diseases, e.g. asthma, or Hodgkin's lymphoma and related diseases. This sequence is used to generate the commonant of the inverseries.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Composition comprising an ordered and repetitive antigen or antigenic determinant array, useful as a medicament, or for manufacturing a medicament for treating allergic eosinophilic diseases, e.g. asthma, c Hodgkin's lymphoma.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         07-NOV-2001; 2001US-0331045P.

The present invention describes an isolated PRO nucleic acid (I). Also CC described: (I) a vector comprising (I); (2) a host cell comprising the CC vector of (I); (3) a process for producing a PRO polypeptides; (4) an isolated PRO polypeptide; (5) a chimeric molecule comprising the CC isolated PRO polypeptide; (5) a chimeric molecule comprising the CC antibody which specifically binds to a polypeptide of (4); (7) a CC composition of matter comprising a polypeptide of (4), an agonist or CC antagonist of the polypeptide or an antibody that binds to the CC composition of combination with a carrier; (8) an article of manufacture CC comprising a container, a label on the container and a composition of CC matter of (7); (9) a method of treating an immune related disease in a sample suspected of having the polypeptide; (11) a method of cdiagnosing an immune related disease or an inflammatory immune response in mammal; (12) a method of identifying a compound that inhibits or commind the activity of or expression of a gene encoding a PRO polypeptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Aggarwal

The PRO sequences have antiallergic, antianaemic, antiarthritic, antiarthmatic, antitibuteric, antitiflammatory, antipeoriatic, antitibuteric, antithyroid, CNS, dermatological, gastrointestinal, haemostatic, hepatotropic, immunostimulant, immunosuppressive, muscular, hepatotropic, immunostimulant, immunosuppressive, muscular, hepatotropic, neuroprotective, osteopathic, respiratory, vasotropic and virucide activities, and can be used in gene therapy. The nucleic acid (I) and the encoded polypaptides, compositions, kits and methods are useful in diagnosing and treating an immune related disease and in stimulating an immune response. The present sequence represents a human
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Multimeric protein; interleukin 5; IL5; TNFalpha; inflammatory disease; tumour necrosis factor alpha; gene therapy; arthritis; interleukin 5; IL5; epitope; human; tetanus toxoid; chimeric.

The immunogenic analogue is useful for preparing a composition for treating inflammatory diseases, e.g., architits. It is also used in gene therapy. The present sequence is a fusion construct which comprises 2 human interleukin 5 (ILS) monomers joined by tetanus toxoid epitopes 2 numer in the presence is used to illustrate the method of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 285 AA,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Claim 20; Page 109-110; 196pp; English.

The immunogenic analogue is useful for preparing a composition for treating inflammatory diseases, e.g., arthritis. It is also used in gene therapy. The present sequence is a fusion construct which comprises 2 human interleukin 5 (IL5) monomers joined by tetanus toxoid epitopes 20 and P2. This sequence is used to illustrate the method of the

                                                                                                                                                                                              The present invention provides the protein and coding sequences of the canine interleukin-5 (IL-5) protein. This can be used to treat allergies, cancer and inflammatory reactions in dogs. The present sequence is one version of the IL-5 protein shown in the specification
                                                                                                                                                                                                                                                                                             Novel canine interleukin 5 polynucleotide and polypeptides are used for generating antibodies which are useful in treating allergies in dogs.

hypothetical protein F24I3.60 - Arabidopsis thaliana
C;Species: Arabidopsis thaliana (mouse-ear cross)
C;Date: 20-Apr-2000 #sequence_revision 20-Apr-2000 #text_change 09-Jul-2004
C;Accession: T47758
R;Nyakatura, G.; Fartmann, B.; Dauner, D.; Sterr, W.; Holland, R.; Weichselgartner, M.;
submitted to the Protein Sequence Database, February 2000
A;Reference number: Z24475
A;Accession: T47758
A;Accession: T47758
A;Status: preliminary
A;Molecule type: DNA
A;Residues: 1-258 <NYA>
A;Cross-references: UNIPROT:Q9MIKO; EMBL:AL138655
A;Cross-references: UNIPROT:Q9MIKO; EMBL:AL138655
A;Superimental source: cultivar Columbia; BAC clone F24I3
C;Genetics:
A;Mote: P24I3.60
C;Superfamily: Arabidopsis thaliana hypothetical protein F24I3.60

  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               B B
